

Network solutions for CSPs

Continuous Integration & Continuous Delivery

We understand the importance of a **streamlined and efficient** development process.

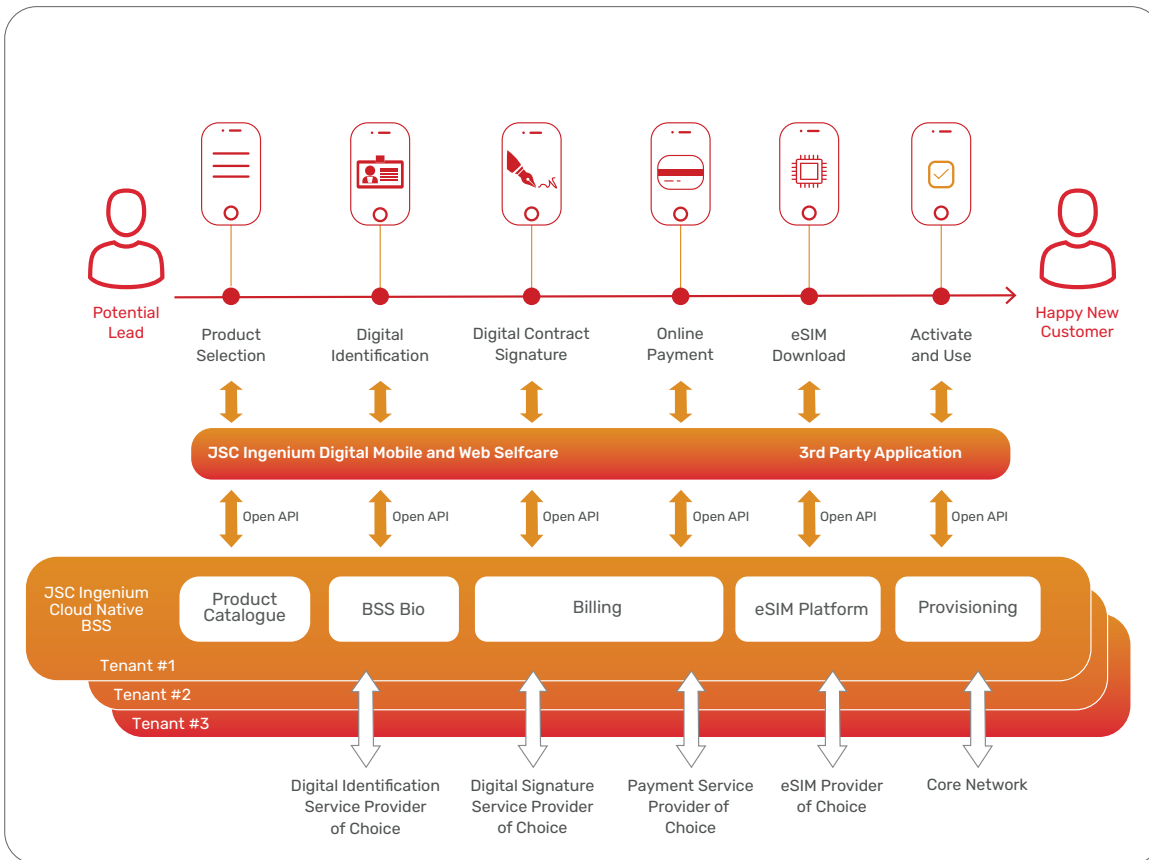

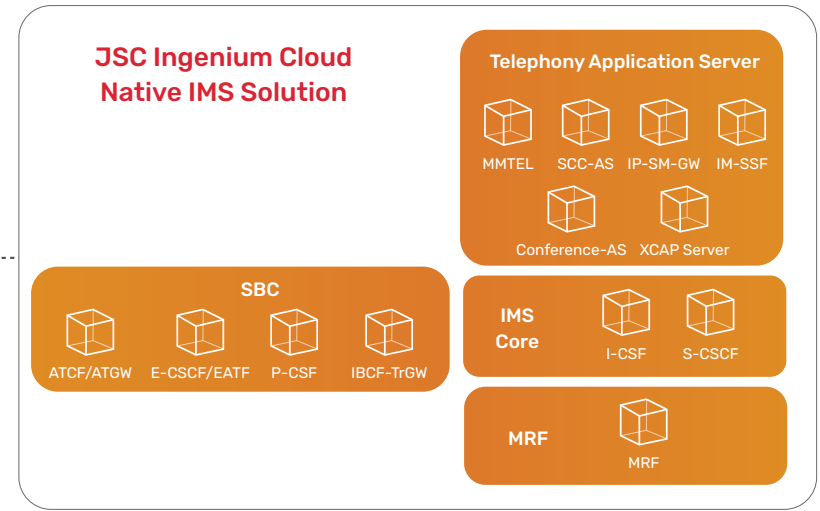

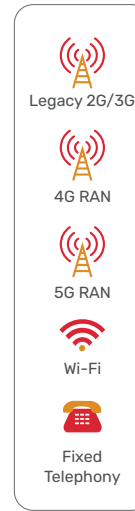

Therefore, all our portfolio includes a **robust Continuous Integration/Continuous Delivery (CI/CD) pipeline**, that allows for seamless integration and automated testing of new code and features, **reducing the risk of errors and improving time-to-market.**

Cloud Native IMS

Our Cloud Native IP Multimedia Subsystem (IMS) solution is designed to meet the growing demands of customers with a **modern, cloud-based IMS solution that supports the latest 4G and 5G technologies** and enhances communication services

- Voice and SMS over IP
- Advanced Call Management Features
- IR.92 Supplementary Services
- Multimedia Conferencing
- Service Announcements
- eSRVCC Support
- VoLTE, VoWifi and VoNR Support
- Converged Fixed and Mobile Communication Services
- Number portability
- Online and Offline Charging
- Multi-Device/Multi-SIM Forking
- Rich Security Features

Digital-centric business model

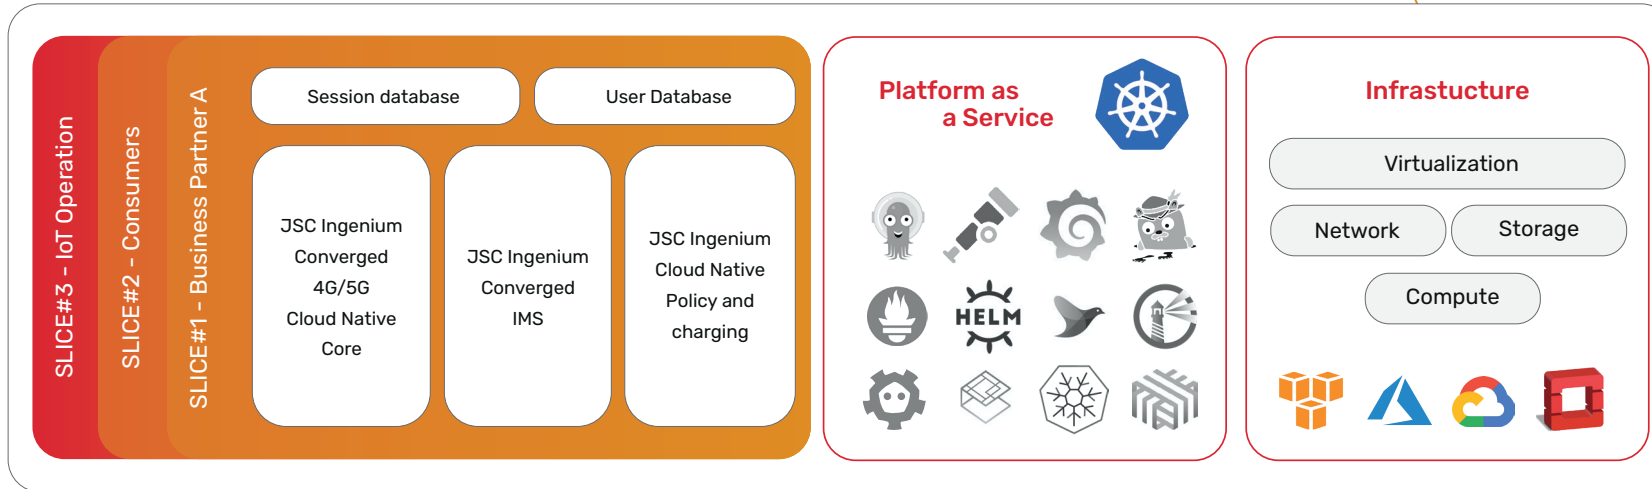

JSC Ingenium Digital BSS/CRM system, deployable natively in the cloud, is a comprehensive solution designed to **streamline operations, reduce costs, and improve customer satisfaction** through digital onboarding and service capabilities.

Hyperelastic Cloud Native Network

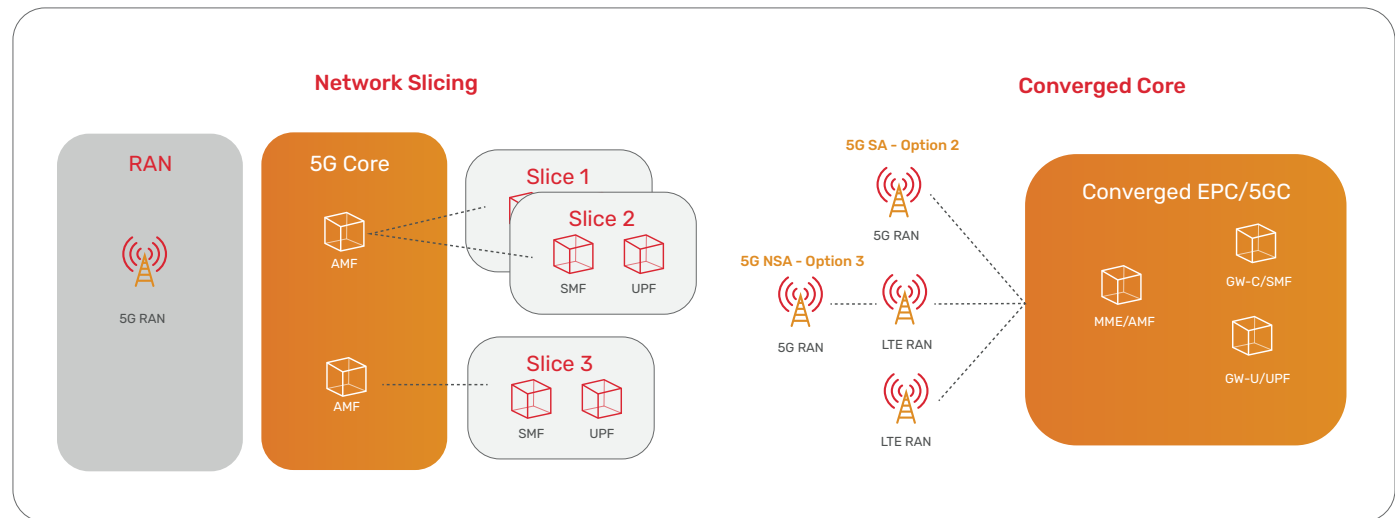

Our Cloud native Hyperelastic network elements provide a **highly scalable and efficient network infrastructure**, optimized for cloud deployment and designed to deliver fast and reliable communication services.

Modular • Scalable • Resilient • Decentralized • Independent • Portable • Integrated with CNCF projects

Slice and Dice: The Future of 5G Core with Convergence and Cloud

The convergence of Cloud technology and Network Slicing has opened up new avenues for the 5G Core to evolve and deliver even greater benefits to CSPs. JSC Ingenium 5G Core is the foundation of the 5G network, delivering faster, more reliable, and more efficient communication capabilities to meet the growing demands of today's connected world.

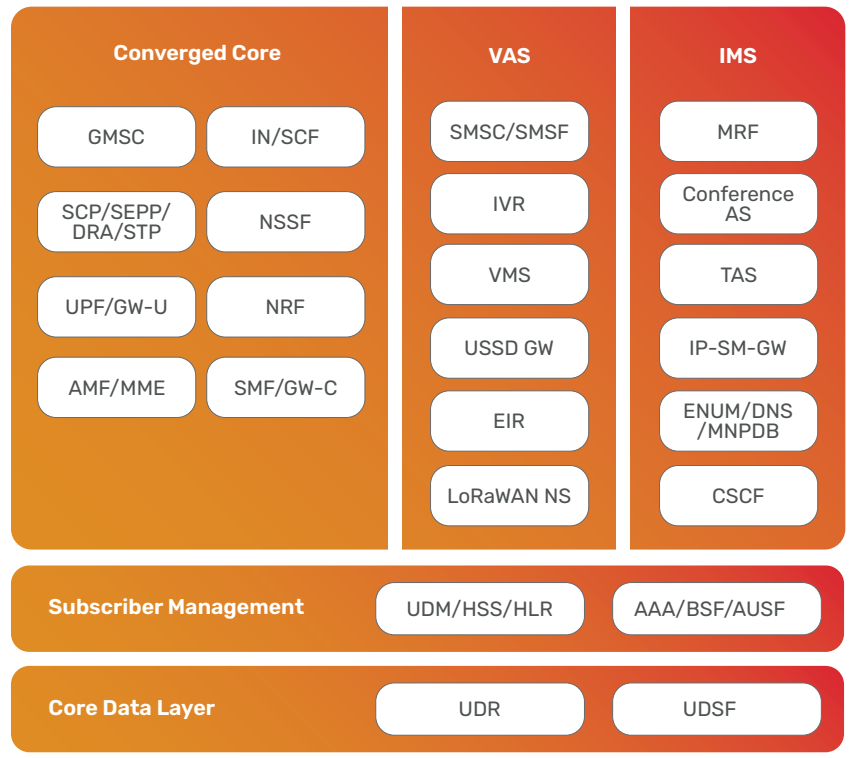

An unbeatable portfolio for all Communication Service Providers

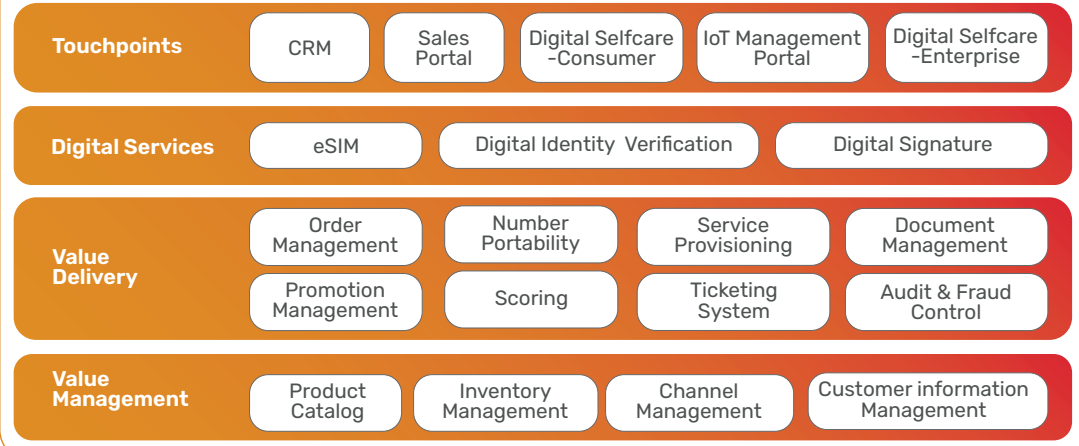

JSC Ingenium product portfolio offers a **comprehensive solution** for the communication industry, delivering **unparalleled performance and reliability**. Each of these solutions is designed to work together seamlessly to provide you with a complete and integrated solution. Whether you're looking **to improve your network performance, manage your revenue streams, or streamline your business operations**, our product portfolio has you covered.
